SURYA PRATAP SINGH

Full Stack Developer | MERN

+91 93895 33233 | suryachaudhary.8449@gmail.com | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student building full-stack web apps with React.js, Node.js, Express.js, and MongoDB, with project experience in REST APIs, JWT and Google OAuth authentication, Razorpay payments, and AI applications using RAG, Gemini, and LangGraph. Seeking SDE Intern, Full Stack (MERN), and Backend Developer roles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, SQL (Basics)
Frontend: React.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Google OAuth 2.0
Databases & Search: MongoDB, Mongoose ODM, MongoDB Atlas Vector Search, MySQL (Basics)
AI / LLM: Retrieval-Augmented Generation (RAG), Gemini API, LangChain, LangGraph, Mistral & Cohere API integration
Tools & DevOps: Git, GitHub Actions (CI/CD), Docker & Docker Compose, Redis (rate limiting), Jest, Postman
Deployment: Vercel, Render, MongoDB Atlas, ImageKit
Core CS: Data Structures & Algorithms, OOP (Java), DBMS, Operating Systems, Computer Networks

EXPERIENCE

Full Stack Developer Intern | ProStackHub (Virtual) **Sep 2026 – Oct 2026**

- Built DeskHub, a two-role helpdesk ticketing application using React, Node.js, Express.js, and MongoDB, with JWT authentication, customer-specific ticket access, agent ticket management, and status updates.

PROJECTS

DocuFlow — AI-Powered Document Workspace (RAG) (GitHub | Live) **Aug 2026 – Sep 2026**

Stack: *MERN*, *Gemini API*, *MongoDB Atlas Vector Search*, *Redis*, *Docker*, *GitHub Actions*

- Built a **RAG** app that processes uploaded PDFs (text extraction, cleaning, chunking), generates Gemini embeddings, and uses **MongoDB Atlas Vector Search** to return grounded answers with similarity scores and source chunks.
- Implemented **JWT access/refresh authentication** with HttpOnly cookies and Redis rate limiting on AI queries; wrote Jest tests for core backend logic; set up Docker Compose, **GitHub Actions CI/CD**, and Vercel/Render deployment.

AI Battle Arena — Multi-Model AI Evaluation Platform (GitHub | Live) **Feb 2026**

Stack: *TypeScript*, *Node.js*, *Express.js*, *LangChain*, *LangGraph*, *Gemini*, *Mistral*, *Cohere*, *React*, *Zod*

- Built a multi-model AI evaluation platform using **LangGraph** to compare Mistral and Cohere responses in a unified React interface, running models in parallel with **Promise.allSettled**.
- Implemented **Gemini**-based structured evaluation with **Zod** schemas for consistent AI output, and built a split-panel comparison view with Markdown rendering and syntax-highlighted code blocks.

Snitch — Full-Stack E-Commerce Platform (GitHub | Live) **Nov 2025 – Dec 2025**

Stack: *React*, *Node.js*, *Express.js*, *MongoDB*, *Redux Toolkit*, *Tailwind CSS*, *Razorpay*, *ImageKit*, *Resend*

- Built a dual-role (Seller / Buyer) platform supporting **multi-variant products** (size, color, price, stock) with ImageKit image uploads, and an end-to-end **Razorpay** payment flow with order creation and signature verification.
- Implemented **Google OAuth 2.0** (Passport.js) and JWT sessions in HttpOnly, Secure, SameSite=None cookies for cross-origin authentication, plus **OTP email verification** (Resend, 10-minute expiry) that blocks unverified logins; deployed on Vercel and Render with MongoDB Atlas.

EDUCATION

Meerut Institute of Engineering & Technology, Meerut **Expected 2027**

B.Tech in Computer Science | CGPA: 8.83/10 (through 6th semester)

SMIC Mandawali, Bijnor — Class XII | 86.80% **April 2022**

ACHIEVEMENTS & CERTIFICATIONS

- 1st Position, Computer Science Branch, 2nd Year — Meerut Institute of Engineering & Technology
- Solved 250+ Data Structures & Algorithms problems on LeetCode
- Introduction to MongoDB (For Students) — MongoDB, Inc. (June 2025)
